

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all versions, and listings, of claims in the application.

Claim Listing

1-68 (Canceled)

69. (previously presented) An isolated fusion molecule comprising a first polypeptide sequence comprising a native human IgG heavy chain constant region capable of specific binding to a native human IgG inhibitory receptor, wherein said native human IgG heavy chain constant region sequence is the native human IgG heavy chain constant region sequence of SEQ ID NO: 2, directly functionally connected to a The isolated fusion molecule of Claim 17 wherein said second polypeptide sequence comprises comprising myelin basic protein (MBP) having the sequence of SEQ ID NO: 12.

70. (canceled)

71. (previously presented) An isolated fusion molecule comprising a first polypeptide sequence comprising a native human IgG heavy chain constant region capable of specific binding to a native human IgG inhibitory receptor, wherein said native human IgG heavy chain constant region sequence is the native human IgG heavy chain constant region sequence of SEQ ID NO: 3, directly functionally connected to a The isolated fusion molecule of Claim 21 wherein said second polypeptide sequence comprises comprising myelin basic protein (MBP) having the sequence of SEQ ID NO: 12.

72. (canceled)
